

#### PROBLEM

## CONNECTING WIRES AND FIBERS

#### SOLUTION

## NICOPRESS®

**A WORLDWIDE LEADER**, Nicopress is meeting challenges of compression sleeves used to terminate or connect wires and fiber with tensile or electro-mechanical requirements in medical device applications. **We offer superior compression solutions for precision wire, medical braids and stranded cable in diameters ranging from .08mm to 5.0mm (.003" to .188").** Materials may include stainless steel, PTFE coated wire, titanium, nitinol, inconel and high performance synthetics.

Nicopress, trusted for more than 100 years, in their innovative connections of fine wire and cables.
